ABOUT US

TRE PONTI® is an Italian brand born out of love for our four-legged friends. It is a registered trademark in more than 70 countries worldwide.

Keyword: ease

How can **putting a harness on** a small dog be made **easier** for an elderly person? Out of this actual need, the founder and CEO of TRE PONTI®, Mr. **Pierantonio Ceconato**, began a storied journey to design and develop his **first patented harness**: the **EASY FIT®**.

To date, we have created over eight primary **harness** designs for small, medium, and large pets, complete with **leashes** and **accessories**.

TRE PONTI® has become a beloved brand for **#PETLOVERS** all over the world thanks to the **design**, **style**, and **nature** of our unique product collections.

An all-Italian product

We firmly believe in our Italian artisan manufacturing process.

That is why every component of our products comes from carefully **selected Italian suppliers**. We have chosen to **invest in our country**, guaranteeing 100% Made in Italy products, from **design to finished product**.

In so doing, every aspect of the production cycle is under our **full control**. We can quickly identify and resolve potential **manufacturing** concerns while maintaining the **highest standards** in our Quality Control processes.

This manufacturing vigilance offers to our customers the assurance that the products are **crafted** and **finished** in the **finest detail**.

OUR PROCESS

Unique artisan craft for our special furry friends

“Made in Italy” means elegance, flair, attention to detail, and, above all, **craftsmanship**. Every harness, leash, and accessory is entirely **handmade**, which means choosing **TRE PONTI®** is choosing a **one-and-only piece**.

Craft(WO)manship

Accuracy and utmost **attention to detail** can only be entrusted to an **all-female team**.

Thanks to our ladies, the long-standing **tradition** of **Italian craftsmanship** is imbued into each of our products.

Our amazing team ensures that each harness, leash, or accessories is **safe, strong**, and always **stylish**.

The stitching makes the difference

At **TRE PONTI®**, nothing is left to chance, not even the **seams**.

In fact, the quality of the stitching is what gives our harnesses and leashes the **strength to withstand sudden and powerful tugs**.

Our expertise employs the latest sewing techniques and ensures that our **products** are **light, comfortable, and safe**.

Quality Check

Each **TRE PONTI®** product is thoroughly checked during the **quality control** process. Defects are immediately reported and render the product non-compliant.

We do not distribute such products; in fact, when a **non-compliant item** is reported, it is **destroyed**.

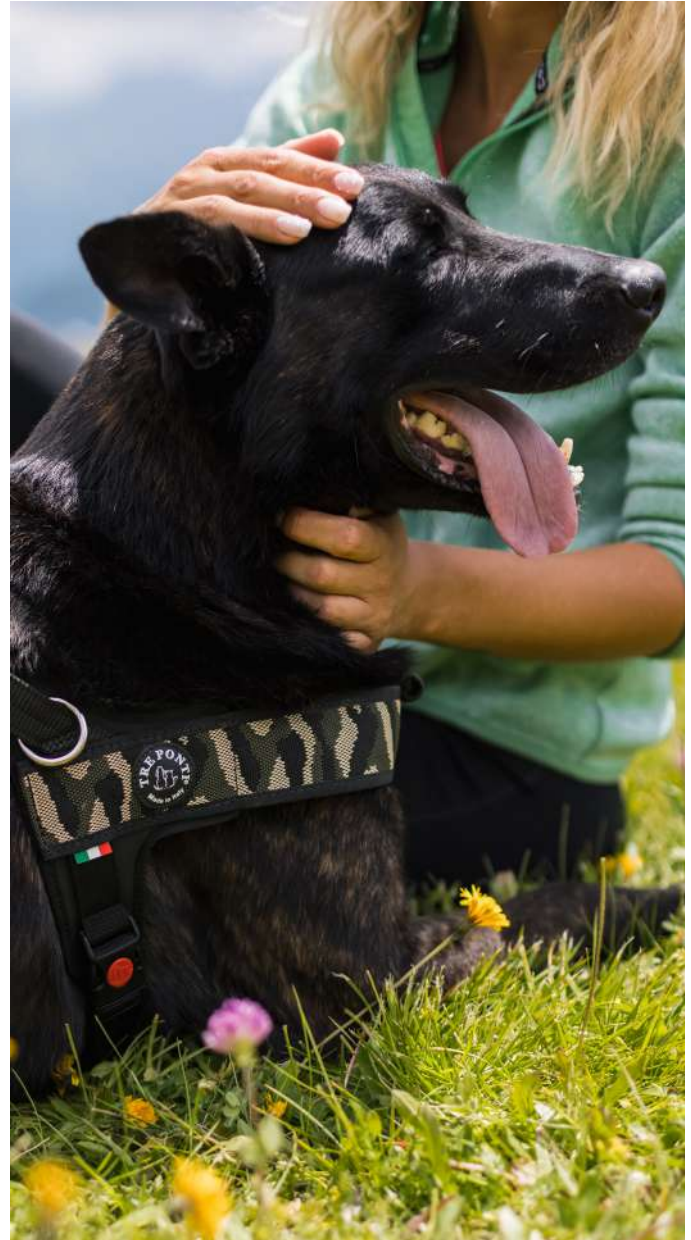

DESIGN & FABRICS

No constrictions, no rubbing

Our design concept is quite simple: the harness **must not impede a pet's freedom** of movement and, at the same time, **must be easy** to put on.

We therefore avoided the “armour” effect that weighs down and hinders, opting for a **minimal design** that relies on **superior materials** and **seams** for its **strength**.

Additionally, our **small-to-medium size harnesses** are **reversible** such that there is no “front” and no “back”. They always fit just right.

Double Side Coated & Mesh Fabrics

Lightness and **comfort**. We **achieved** these aims by choosing two primary materials: **Double Side Coated** and **Mesh** fabrics.

The first comes from the footwear sector. It is a **technical material**, made up of two layers inside which **1,000 denier webbing** is inserted to increase the resistance.

Waterproof, easy-to-clean and **ergonomic**, the Double Side Coated fabric glides over fur and is the ideal solution for **pets** with **medium-to-long hair**.

Mesh is a **surprisingly soft**, non-absorbent material. Although its weight is only **250 gr/m²** (8,8 oz/ft²), this fabric maintains a **remarkable resistance** to **traction** and **tearing**, ensuring the **safety** of the pet.

Precisely because the material is light as a feather, mesh harnesses are a **great choice** for **pets** having a **slender** build or **sensitive** skin.

Double Side Coated Fabric

The reversible design simplifies the use of our **double-coated harnesses**, making them easy to put on and take off.

Double-coated fabrics are engineered to our specifications, resistant, water-repellent and hypoallergenic.

Thanks to the absence of undesirable internal seams, the material **does not irritate the skin** and prevents knots.

The **ergonomic nature** of this fabric makes double-coated harnesses highly malleable: the material **adapts perfectly** to the pet's body shape, reproducing a "second skin" effect.

Mesh Fabric

Our unique mesh fabric is engineered for ease of use, making our **mesh harnesses** easy to put on and take off.

The mesh is **soft**, breathable, **light** and allows maximum freedom to movement. Thanks to the total absence of internal seams, this material **does not irritate skin**, including very sensitive skin.

As a **safety** feature, a **reflective insert** wraps around the harnesses and effectively provides improved visibility during **night walks**.

SIMPLICITY IN TOTAL SAFETY

We know how exciting it is for your pet to go for a walk, and we know that getting them ready can be a real challenge.

This is why we have developed three main closures: adjustable strap, click, and click adjustable. Putting the harness on and taking it off your pet has never been so easy!

Adjustable Strap

Entirely made of **high-tenacity** polyester cord, this **tubular strap** has been **certified** to ensure the safety of the pet.

In the event of chewing, cutting, or damage from wear and tear, we suggest replacing the strap with a new **TRE PONTI®** original one.

Harnesses with **strap closures** allow **optimal adherence** to the pet's body, and they are ideal for all those **small furry friends** such as **cats, bunnies**, or **very small dogs** such as Chihuahuas, Pinschers, or Bichons à Poil Frisé. They are also the perfect choice for small puppies, since this closure helps them not pull during their first walks. Another perk of this model is that there is no "front" or "back", making it super easy to put on.

Click closure with double safety ring

Closing the harness has never been so **quick** and **easy**, thanks to the **curved acetal resin buckle**. The closure is extra secure with double rings for attaching the leash.

The click closure harness models are ideal for pets that have **finished** their **growth phase**. Like the adjustable strap closure, this model has no front or back, making it effortless to put on and take off.

Click closure with adjustable girth

These models include an adjustable band that **allows the harness to adapt perfectly** to the size of the pet.

This closure affords flexibility in sizing and is **ideal** for growing puppies or small friends with a **bulky chest** such as Pugs, Cavalier King Charles Spaniels, Dachshunds, or French Bulldogs.

SMALL AND MEDIUM PETS

HARNESSES

Two fluffy puppies, likely Australian Shepherds, are shown in a close-up shot. The puppy on the left has striking blue eyes and a mix of grey, black, and tan fur. The puppy on the right has a white blaze on its face and a mix of grey, black, and tan fur. Both are wearing harnesses; the one on the left is purple and the one on the right is blue and black. They are sitting on a rocky, grassy surface.

CHARISMA COLLECTION
FLEECE COLLECTION
PALETTE COLLECTION
CAMOUFLAGE COLLECTION

GENESIS COLLECTION

Focusing on the traditional colours of the Easy Fit® model, Genesis represents our deepest roots.

Pink, light blue, black, and red double-coated harnesses are presented in the two classic trims: Silver and Onyx. Mesh brings together three colours: red, black, and blue. Soft and light as a feather, it is suitable for all slimmer and more sensitive builds.

The traditional TRE PONTI® closures complete the collection, ensuring the best ergonomics, resilience, and comfort.

CHARISMA COLLECTION

Charisma conveys the desire for **personal expression** throughout its four lines. Beauty, vitality, appeal, and elegance are the inspiring concepts of this wonderful collection.

Refinement: this is **Grace's** core, enriched by a sophisticated polka-dot bow tie, in the spirit of classic elegance. Vibrant fantasy, on the other hand, is the watchword for **Vibes**, where flamingo and avocado prints reign supreme.

Glamour and charm are the focuses of **Python:** its colour shades ensure an unparalleled exotic effect.

Finally, for those who love sub-Saharan animal looks, **Savannah** is certainly the perfect choice to enchant even the most demanding pets.

BRIO®

FORZA®

POTENZA®

PRIMO®

PRIMO PLUS®

FLASH®

MENTOR®

WAVE®

Wave® is the only large-dog harness that has a **step-in** fit like the Easy Fit®.

Wave's unconventional design follows the natural curves of your dog and can help in the case of e-cones.

The closure consists of a ratcheting buckle and a ladder strap that can be easily adjusted, as well as two safety rings to hook onto the leash. When adjusting the harness, make sure to leave at least two teeth at the strap's external end.

Like all Tre Ponti harnesses, Wave has been conceived to be ergonomic and comfortable. The **technical material** helps the harness take the shape of the pet's body. Also, it is waterproof and super easy to clean.

BRIO®

Brio® is the perfect harness for pets with **distinctive body shapes**.

The bigger sister of our Easy Fit® harness, Brio is the most versatile of our large models, thanks to its structure of double-coated technical material and the back band. Its **padded front band** and adjustable girth ensure a fit that is both **ergonomic** and **comfortable**.

You can walk your pet in total safety thanks to the acetal resin side buckle with **safety lock**. The **sliding O-ring** on the handle helps stability during walks and can help to prevent erratic movements that could cause tension on the arm.

The position of the double-sewn, streamlined **handle** is **45°** and provides additional control that can help to avoid unnecessary yanks and tugs.

DESIGN & LINES

Features	Structure in double-coated technical material, and black trim. Padded front band. 45° fixed handle in double webbing with sliding O-ring.
Fit	Head-on
Suitable for	All breeds from medium to large size.

FORZA®

Forza® is ideal for helping large pets **learn** how to **behave** during **walks**.

The handle is not fixed, but glides through the two side rings. If the pet pulls too much, the handle pulls the rings closer together. This mechanism creates a **soft pressure** along the harness that tells the pet to stop or slow down and keep pace **without causing** any **damage** or pain to the joints.

The structure of **double-coated technical material**, the front padded band, and the **adjustable** girth band ensure unparalleled **ergonomics** and **comfort**.

You can walk your pet in total safety thanks to the acetal resin side buckle with **safety lock**.

The **D-ring** on the **sliding handle** prevents erratic movements that could cause tension on the arm while walking the dog and provides additional **control** that can help to avoid unnecessary yanks and tugs.

PRIMO®

Primo® is the perfect harness for all pets who enjoy freedom while remaining **comfortable**. Its **double-layered structure**, cosy **padded front band**, and **adjustable girth band** ensure an extremely comfortable, ergonomic fit. The **45-degree back handle** provides additional control that can help to avoid unnecessary yanks and tugs.

You can walk your pet in comfort and safety thanks to the side-mounted acetal resin buckle with **safety lock**. The **sliding O-ring** on the handle can help to prevent erratic movements that could cause tension on the arm while walking the dog.

Available in four models - **Silver** with its reflective trim for walks in low-light conditions; **Onyx** in black trim; **Carbon** in the carbon-look back strap; **Camouflage** in colourful back straps - Primo is ideal for those pets with a “right angle” back, such as Labrador or Mastiff.

MENTOR®

MENTOR special harnesses for special dogs

Mentor is a harness designed especially for **Guide** and **Assistance dogs**.

This harness came about from the need to make the work of those amazing dogs light, functional, and comfortable. The patented **special structure** of Mentor provides **balance** and **control**, and the exceptional stitching is done with the intent that the harness is to be worn for long periods. The harness gently wraps around the pet's body, like a second skin.

The **two side rings** help hook the handle with ease and total stability.

The position of the **handle** is **45°** which provides additional **control**.

The **fixed ring** on the back part has the primary function of keeping the handle in **vertical position**, instead of falling onto the pet's back; also, it can also be used as a normal **hook** for leashes.

SIZE GUIDE

The best way to choose the **right** harness is to consider your **pet's chest girth** first. Generally, and depending on your pet's size (small, medium, or large), you can **measure** the chest girth with a tailor's tape **3-4 cm from its armpit**.

It is very important to select the right size of your harness; Tre Ponti harnesses are 100% safe when sized correctly. It's like a pair of shoes: the right number depends on the model and even the best shoe needs to be your size to make you feel good with it.

How to **check** if your harness is the **correct size** for your pet? Easily done. Just put a finger between the harness and your pet's body. If you can keep contact with both the harness and your pet's skin while moving your finger along the inside of the harness, the size is **correct**.

If you struggle to insert your finger, the harness is **too tight**; and if there is plenty of room and you cannot touch both the harness and the pet's body at the same time with one finger, the harness is **too loose**.

Our size charts are only to be considered as a **guide**. Because our harnesses are all **handmade**, they can differ by 1-2 cm. Every pet is unique, and the best way to check the right size (and model) is to try it on!

HARNESSES SMALL-MEDIUM

EASY FIT® double-coated material ADJUSTABLE STRAP

SIZE	WEIGHT	CHEST GIRTH IN CM
1	from 1 a 3 kg	from 23 to 33 cm
1 1/2	from 3 a 4 kg	from 27 to 37 cm
